DECATHLON

SPORT FOR ALL - ALL FOR SPORT

Company Overview & Project Background

> To make the pleasure and benefits of sports accessible to the many.
>
> – Decathlon Purpose

Decathlon is a global multi-sports retail brand that offers a wide range of high-quality sports products at affordable prices. The company is present in **70+ countries** with a strong omni-channel presence.

Company	Decathlon
Industry	Retail / Sports Equipment
Project Type	Business Intelligence Dashboard
Tool Used	Microsoft Excel
Dataset	30,000 Sales Transactions

EXCEL FEATURES USED

- **Power Query** — Data extraction and transformation
- **Power Pivot** — Data modeling and relationship management
- **Pivot Tables** — Data summarization and analysis
- **Pivot Charts** — Visual representation of insights
- **Power Map** — Geographical visualization of sales
- **Slicers** — Dynamic filtering of data
- **Timelines** — Time-based analysis and filtering
- **Conditional Formatting** — Highlight important data patterns
- **GETPIVOTDATA** — Dynamic data retrieval from pivot tables
- **Dashboard Design** — Interactive and user-friendly dashboard creation

DIMENSION TABLES

- **Date** — Contains date and time information
- **Customer** — Customer demographics and details
- **Product** — Product categories and details
- **Store** — Store locations and details
- **Promotion** — Promotion campaigns and offers
- **Salesperson** — Salesperson information and details

FACT TABLE

Sales Transactions

Contains all sales transaction data including revenue, profit, quantity, discounts, returns, ratings, etc.

This project leverages **Microsoft Excel**'s powerful data modeling, analysis, and visualization capabilities to transform raw sales data into meaningful business insights.

DECATHLON

SPORT FOR ALL - ALL FOR SPORT

Business Problem Statement

Decathlon's sales and operational data are scattered, manual, and disconnected, making it difficult to gain **real-time insights** and take **data-driven decisions**.

> Lack of visibility is leading to missed opportunities and inefficient decisions.

Business Stakeholders

01 Sales reports are scattered across multiple Excel sheets.

Data is spread across different files, making consolidation time-consuming and error-prone.

02 Difficult to monitor revenue and profitability.

Lack of a centralized dashboard makes it hard to track overall business performance.

03 Unable to compare store performance efficiently.

Manual comparison of stores is time-consuming and lacks drill-down capabilities.

04 Limited visibility into customer purchasing behaviour.

Customer trends, preferences, and segments are not clearly understood.

05 Promotion effectiveness is unknown.

No clear analysis of which promotions drive sales and provide better ROI.

06 Product return analysis is missing.

Return reasons and patterns are not tracked, leading to repeated issues.

07 Slow manual reporting process.

Reports are manually created, which takes hours of effort every time.

08 Decision-making is time-consuming.

Lack of real-time insights delays strategic decisions and action-taking.

IMPACT

- Missed opportunities and revenue loss
- Inefficient operations and higher manual effort
- Inconsistent performance monitoring
- Reduced customer satisfaction

DECATHLON

SPORT FOR ALL - ALL FOR SPORT

Client Business Objectives

The primary objective of this project is to build an interactive and dynamic dashboard that helps Decathlon gain **actionable insights** across sales, operations, customers, and profitability.

01 Monitor Sales Performance

Track overall sales, revenue, profit, and key KPIs over time.

02 Evaluate Store Performance

Compare store performance based on revenue, profit, orders, and quantity sold.

03 Understand Customer Behaviour

Analyze customer demographics, segments, purchase patterns, and preferences.

04 Analyze Promotion Effectiveness

Identify high-performing promotions and evaluate their impact on sales and profit.

05 Analyze Product Performance

Evaluate products and categories based on sales, profit, returns, and quantity sold.

06 Track Returns & Profitability

Monitor return trends, and analyze their impact on profitability.

07 Geographical Analysis

Visualize sales and profit distribution across regions and states.

08 Enable Dynamic Filtering

Allow users to filter data by time, store, category, region, and more for custom analysis.

09 Simplify Reporting Process

Automate reports and reduce manual work using interactive dashboards.

10 Support Data-Driven Decision Making

Provide actionable insights to support strategic planning and business growth.

> “The goal is to turn data into insights and insights into **better business outcomes.**

Data-Driven Decisions
Stronger Business Performance

EXPECTED IMPACT

- Improved Sales Growth
- Higher Profitability & Cost Efficiency
- Better Customer Satisfaction
- Smarter & Faster Business Decisions

DECATHLON

SPORT FOR ALL - ALL FOR SPORT

“

A structured data approach to transform raw sales data into meaningful business intelligence.

Data → Insights → Actions → Impact

Our Approach & Methodology

A systematic and structured approach was followed to collect, process, analyze, and visualize data to create an interactive dashboard that delivers actionable insights.

01 — Data Collection

Collected raw sales data from multiple sources including transactions, products, stores, customers, and promotions.

02 — Data Preparation

Data cleaning, transformation, and standardization performed using Power Query to ensure data quality and consistency.

03 — Data Modeling

Created a relational data model using Power Pivot with fact and dimension tables to establish relationships.

04 — Data Analysis

Performed in-depth analysis using Pivot Tables, DAX calculations, and measures to extract key insights.

05 — Dashboard Design

Designed interactive and user-friendly dashboards with slicers, KPIs, charts, and dynamic visualizations.

06 — Insights & Actions

Converted insights into actionable recommendations to support data-driven decision making and business growth.

DATA SOURCES

- Sales Transactions
- Product Master
- Store Master
- Customer Data
- Promotion Details
- Date Calendar

Total Records Analyzed: **30,000+** Sales Transactions

TOOLS & TECHNOLOGIES USED

- Microsoft Excel
- Power Query
- Power Pivot
- Pivot Tables
- DAX Measures
- Slicers & Filters

This methodology ensures accurate, reliable, and insightful analysis for effective business decision-making.

DECATHLON

SPORT FOR ALL - ALL FOR SPORT

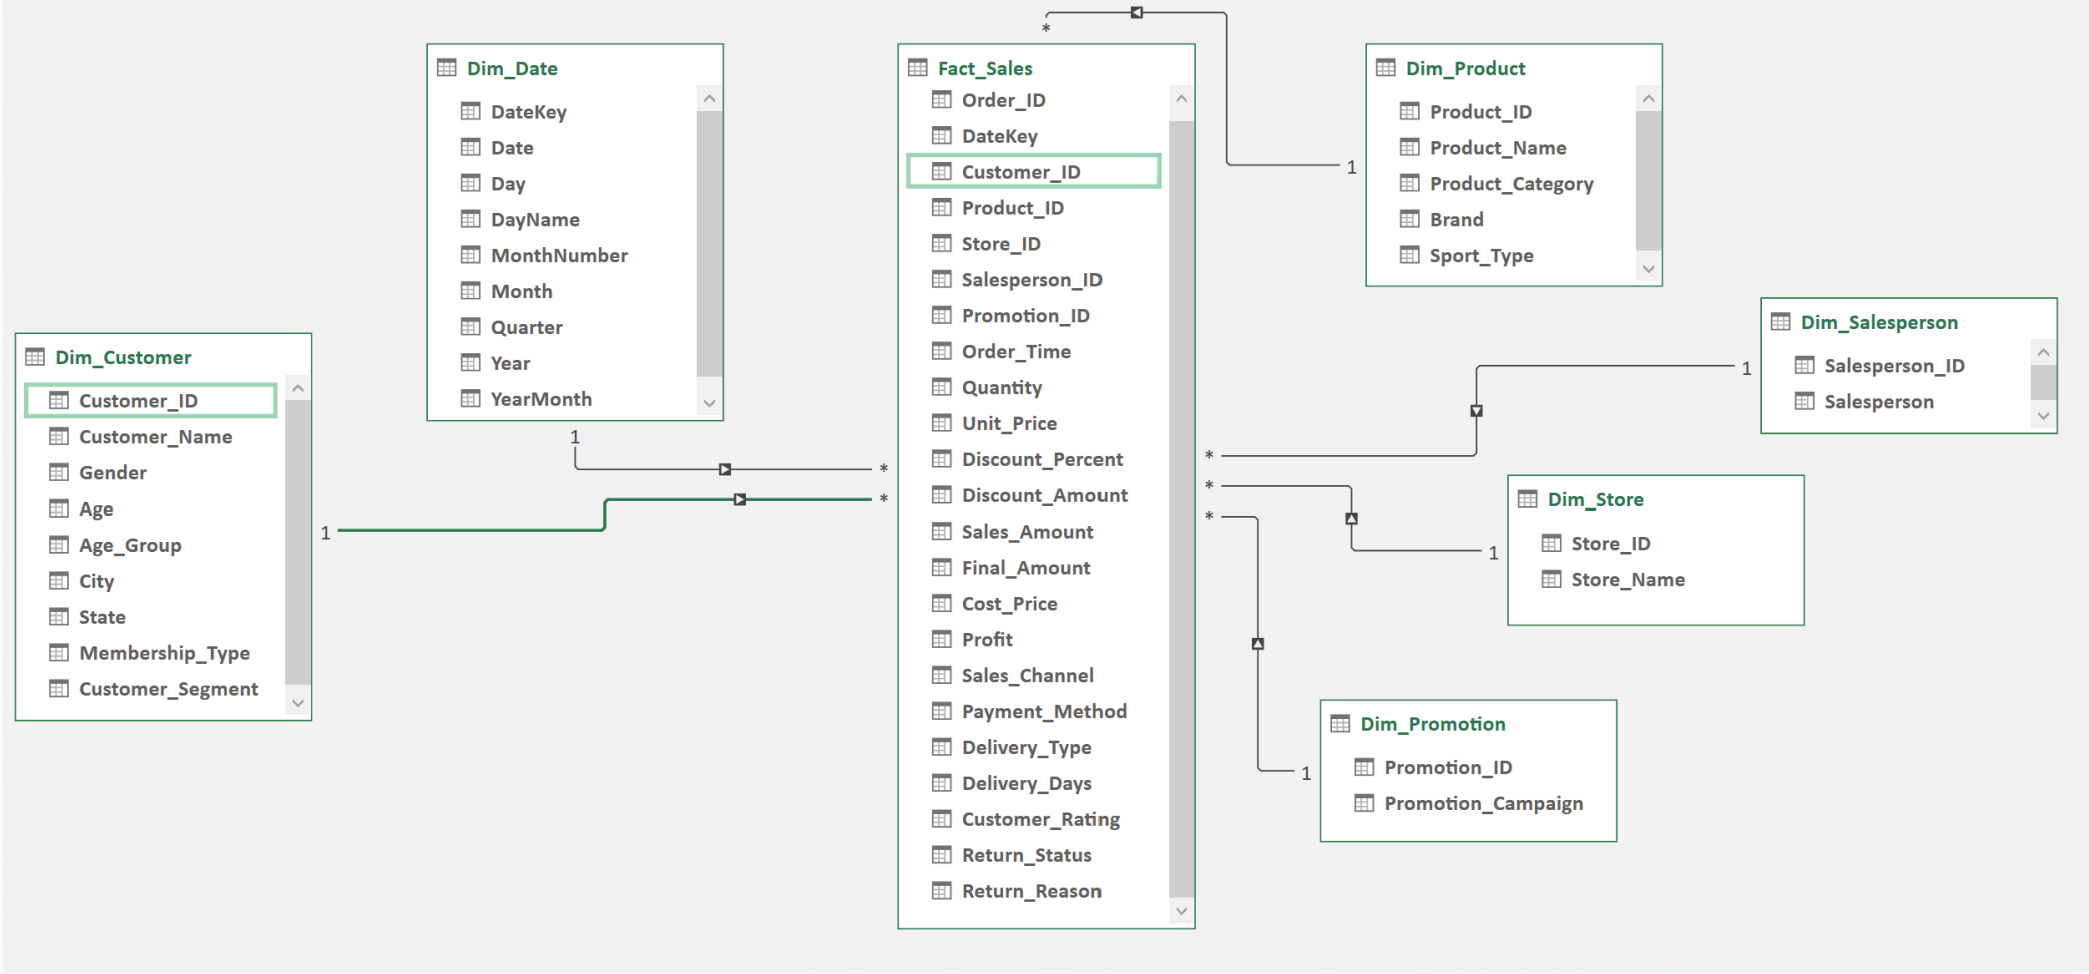

> Good data is the foundation of every great insight.

Data Quality Assurance

- Data Cleaning
- Duplicate Removal
- Missing Value Handling
- Consistent Formatting
- Data Validation

Data Modeling

About the Data Model

- The model follows a Star Schema.
- Fact_Sales is the central fact table connected to dimension tables.

This model enables efficient analysis and easy exploration of sales performance across different dimensions.

Executive Dashboard | Key Insights & Recommendations

This dashboard provides a high-level view of overall business performance across sales, profit, orders, customers, and key dimensions. The following insights highlight important trends and opportunities for growth.

KEY INSIGHTS

1 Strong Overall Performance
Total Revenue of ₹36.71 Cr and Profit of ₹11.27 Cr with a healthy profit margin, indicating robust business performance.

2 Consistent Order Volume
Total Orders reached 30.00K with Quantity Sold at 90.83K, showing strong demand and customer engagement.

3 Promotions Drive Revenue
Winter Sports Fest generated the highest revenue, followed by Back To Sports and Diwali Mega Sale.

4 Balanced Sales Across Channels
Sales are almost evenly distributed across Mobile App, Store, and Website, with Mobile App contributing a slightly higher share than the other two channels.

5 Cycling Category Tops
Cycling is the highest revenue- and profit-generating product category, indicating strong customer demand and healthy profitability.

6 Maharashtra Leads Revenue
Maharashtra is the highest revenue-contributing state, indicating a strong regional market and future expansion opportunity.

STRATEGIC RECOMMENDATIONS

Focus on Scale & Efficiency
Continue to optimize operations and cost management to maintain profitability while scaling revenue further.

Maintain Customer Engagement
Maintain customer engagement through loyalty programs and personalized promotions to increase repeat purchases and retention.

Invest in High-Impact Promotions
Allocate more budget to top-performing campaigns like Winter Sports Fest to maximize ROI.

Continue Investing Across All Channels
Continue investing across all sales channels, as Mobile App, Store, and Website contribute almost equally to total revenue.

Expand Cycling Category
Increase product variety, stock availability, and targeted promotions for the cycling category.

Replicate Success in Other Regions
Replicate successful strategies from Maharashtra in lower-performing regions to improve overall sales performance.

Overall Summary
The Executive Dashboard provides a consolidated view of business performance, enabling management to monitor KPIs, identify top-performing products and promotions, evaluate regional sales, and make data-driven strategic decisions.

Key Takeaway
Decathlon's business is performing strongly across key metrics. Focusing on top-performing categories, effective promotions, balanced channel investments, and regional expansion will drive sustained growth and higher profitability.

Slide 9: Store Dashboard – Key Insights & Recommendations

Data Period: 2024 – 2026
Total Orders: 30,000

KEY BUSINESS INSIGHTS

Store Performance

- Decathlon Mumbai generated the highest revenue (~₹7.62 Cr) and also recorded the highest profit, making it the best-performing store.
- Decathlon Bengaluru generated the lowest revenue and profit, indicating improvement opportunities.

Salesperson Performance

- Karan Sharma contributed the highest sales revenue among all salespersons.
- Performance differences between salespersons are relatively small, showing a balanced sales team.

Time Slot Analysis

- Afternoon is the busiest shopping period, contributing the highest revenue and order share (≈35.6%).
- Evening is the second most productive time slot.
- Night records the lowest customer activity and revenue.

Payment Method Analysis

- Revenue is almost evenly distributed across Card, Cash, UPI, and Wallet payments.
- Wallet payments contribute the highest share (≈26%), followed closely by Cash and UPI.
- Customers actively use multiple payment options, indicating balanced payment preferences.

BUSINESS RECOMMENDATIONS

1 Improve Low Performing Stores

- Analyze operational practices of Mumbai store and replicate them in Bengaluru and other lower-performing stores.
- Review staffing, local promotions, and inventory availability.

2 Increase Afternoon Capacity

- Schedule more staff during afternoon hours.
- Ensure fast billing counters and adequate inventory during peak shopping time.

3 Boost Night Sales

- Launch evening and night-exclusive offers.
- Introduce flash discounts and digital promotions after 6 PM.

4 Reward High Performers

- Recognize top-performing stores and salespersons through incentive programs.
- Share best sales practices across all stores.

5 Strengthen Digital Payments

- Continue promoting Wallet and UPI payments through cashback offers and loyalty rewards.
- Maintain multiple payment options to improve customer convenience.

BUSINESS IMPACT

- Improved store-level performance monitoring
- Better workforce planning based on peak shopping hours
- Increased operational efficiency through data-driven decisions
- Higher customer convenience with optimized payment options
- Improved sales performance across all stores through benchmarking

Customer Analysis

Slide 10: Customer Dashboard – Key Insights & Recommendations

Data Period: 2024 – 2026
(From Customer Analysis Dashboard)

KEY CUSTOMER INSIGHTS

1. Average Customer Rating by Delivery Speed
- Fast delivery has the highest average rating (≈3.01).
- Normal delivery has a similar rating (≈3.00).
- Slow delivery has the lowest average rating (≈2.93).

2. Revenue by Membership Type
- Basic membership generates the highest revenue.
- Premium membership contributes moderate revenue.
- Elite membership contributes the lowest revenue.

3. Return Reasons (Count of Orders)
- Top return reasons are Wrong Item Delivered (550), Changed Mind (546), and Size Issue (502).
- Defective Product (412) and Late Delivery (406) contribute comparatively fewer returns.

4. Revenue Share by Gender
- Revenue is evenly distributed between Female and Male customers.
- Female: 50% | Male: 50%

5. Revenue Share by Age Group
- Adult contributes the highest revenue (69%).
- Senior contributes 18%.
- Teen contributes 13%.

6. Order Share by Customer Segment
- Returning customers contribute the highest order share (44.99%).
- Loyal customers contribute 30.34%.
- New customers contribute 24.67%.

BUSINESS RECOMMENDATIONS

1. **Improve Slow Deliveries**
Analyze causes of slow deliveries and optimize logistics to improve customer satisfaction and ratings.

2. **Promote Membership Upgrades**
Encourage Basic members to upgrade to Premium through exclusive offers, early access, and loyalty rewards.

3. **Reduce Top Return Reasons**
Improve order accuracy to reduce Wrong Item Delivered, provide better size guides, and strengthen product quality checks.

4. **Maintain Balanced Gender Engagement**
Continue running inclusive campaigns and personalized promotions for both female and male customers.

5. **Focus on Adult Segment**
Adults contribute the highest revenue. Launch targeted offers for this segment and create engaging campaigns to attract Teen customers.

6. **Increase Customer Retention**
Strengthen loyalty programs to retain Returning customers and convert New customers into Loyal customers.

BUSINESS IMPACT

- Higher customer satisfaction through faster deliveries
- Reduced product returns and improved quality
- Improved customer retention and loyalty
- Better targeted marketing and engagement
- Increased revenue and stronger customer relationships

Source: Decathlon Sales Dataset (2024 – 2026) | Microsoft Excel Dashboard

OVERALL BUSINESS INSIGHTS & STRATEGIC RECOMMENDATIONS

Consolidated insights from all dashboards to drive growth, efficiency, and customer satisfaction.

EXECUTIVE SUMMARY

This project analyzed Decathlon's Sales Performance & Profitability using an interactive Microsoft Excel dashboard solution. By consolidating sales, store, product, and customer data into three dynamic dashboards, the analysis provides management with a single source of truth for monitoring performance and supporting data-driven business decisions.

KEY BUSINESS METRICS (EXECUTIVE OVERVIEW)

TOTAL REVENUE	TOTAL PROFIT	TOTAL ORDERS	QUANTITY SOLD	AVERAGE ORDER VALUE
₹36.71 Cr	₹11.27 Cr	30K	90.83K	₹12,236

OVERALL BUSINESS INSIGHTS

1. REVENUE & PROFIT PERFORMANCE

- The business generated ₹36.71 Cr in Total Revenue and ₹11.27 Cr in Total Profit.
- A total of 30K orders were processed, selling 90.83K units.
- The Average Order Value (AOV) is ₹12,236, indicating strong transaction value.
- Monthly revenue remains relatively stable throughout the year, with **May** recording the highest revenue.

2. PRODUCT PERFORMANCE

- **Cycling** is the highest revenue-generating product category.
- It also records the highest revenue and profit among the displayed product categories.
- **Winter Sports Fest** is the most successful promotion campaign, generating the highest revenue.

3. STORE PERFORMANCE

- **Decathlon Mumbai** is the highest-performing store in both revenue and profit.
- **Decathlon Bengaluru** records the lowest revenue and profit, indicating opportunities for operational improvement.
- **Karan Sharma** is the highest-performing salesperson based on total revenue generated.

4. CUSTOMER BEHAVIOR

- **Returning Customers (44.99%)** contribute the largest share of orders, followed by **Loyal Customers (30.34%)** and **New Customers (24.67%).**
- Revenue contribution is evenly distributed between **Male (50%)** and **Female (50%)** customers.
- **Adult** customers **(69%)** generate the highest share of revenue.
- **Basic Membership** customers contribute the highest revenue among all membership types.

5. CUSTOMER EXPERIENCE

- Customers receiving **Fast Delivery** provide the highest average rating **(3.01)**.
- The most common return reasons are:
  1. Wrong Item Delivered (550)
  2. Changed Mind (546)
  3. Size Issue (502)
- Other return reasons include:
  - Defective Product (412)
  - Late Delivery (406)

STRATEGIC BUSINESS RECOMMENDATIONS

1. INCREASE REVENUE GROWTH

- Continue investing in high-performing product categories such as **Cycling.**
- Replicate successful promotional strategies from **Winter Sports Fest** across future seasonal campaigns.

2. IMPROVE STORE PERFORMANCE

- Benchmark the operational practices of **Decathlon Mumbai** and implement them in lower-performing stores, especially **Decathlon Bengaluru.**
- Regularly monitor store-level KPIs to improve profitability and operational efficiency.

3. ENHANCE CUSTOMER EXPERIENCE

- Improve delivery speed to increase customer satisfaction and ratings.
- Strengthen order verification and quality control processes to reduce product returns.

4. STRENGTHEN CUSTOMER RETENTION

- Introduce targeted loyalty programs to convert **New Customers** into **Loyal Customers.**
- Provide personalized offers and rewards for **Returning Customers** to encourage repeat purchases.

5. OPTIMIZE BUSINESS OPERATIONS

- Allocate additional staff and inventory during **Afternoon**, the peak shopping period.
- Continue supporting multiple payment methods, as customers actively use **Card**, **Cash**, **UPI**, and **Wallet** payments.

6. LEVERAGE DATA FOR BETTER DECISIONS

- Use data-driven insights for targeted marketing, inventory planning, and improving profitability.
- Continuously track key metrics to identify trends and emerging opportunities.

OVERALL BUSINESS IMPACT

- Centralized business performance monitoring through interactive dashboards.
- Faster and more informed management decision-making.
- Improved visibility into sales, store, and customer performance.
- Better inventory and promotional planning.
- Enhanced customer satisfaction through data-driven operational improvements.
- Reduced product returns and stronger customer retention strategies.
- Supports profitability improvement by focusing on high-performing products, stores, and promotions.

KEY TAKEAWAYS

REVENUE: ₹36.71 Cr | **PROFIT:** ₹11.27 Cr | **ORDERS:** 30K | **QUANTITY SOLD:** 90.83K | **TOP CATEGORY:** Cycling | **BEST STORE:** Decathlon Mumbai | **TOP SALESPERSON:** Karan Sharma

PEAK TIME: Afternoon | **LARGEST CUSTOMER SEGMENT:** Returning Customers (44.99%) | **MOST COMMON RETURN REASON:** Wrong Item Delivered (550)

PROJECT CONCLUSION

This project delivered a comprehensive Excel-based Business Intelligence solution for Decathlon to analyze sales performance, store efficiency, product performance, and customer behavior through interactive dashboards.

PROJECT SUMMARY

An interactive Excel dashboard was developed by consolidating sales, store, product, and customer data into three dynamic dashboards. The dashboards provide a **single source of truth** for monitoring KPIs, discovering insights, and enabling **data-driven decision-making** to improve business performance, customer experience, and profitability.

WHAT WE ACHIEVED

CENTRALIZED DATA INTEGRATION
Consollactied sales, store, product, and customer data into a single, structured Excel data model.

INTERACTIVE DASHBOARDS
Designed 3 dynamic dashboards for Executive Overview, Store Performance, and Customer Analysis.

ACTIONABLE INSIGHTS
Identified key trends, top performers, and improvement areas across multiple business dimensions.

DATA-DRIVEN DECISIONS
Empowered management to make informed decisions to improve performance and profitability.

PERFORMANCE MONITORING
Enabled real-time monitoring of KPIs for continuous tracking of business performance.

BUSINESS IMPACT
Enhanced efficiency, customer satisfaction, and profitability through insights and strategic actions.

KEY TAKEAWAYS FROM THE DASHBOARDS

The burainess generated **₹36.71 Cr** in Total **Revenue** and **₹11.27 Cr** in Total Profit from **30K** orders, selling **90.83K** units.

Cycling is the highest revenue and profit generating product category. **Winter Sports Fest** is the most successful promotion campaign.

Decathlon Mumbai is the top-performing store in revenue and profit, while **Decathlon Bengaluru** is the lowest-performing store.

Karan Sharma is the top-performing salesperson based on total revenue generated.

Returning Customers (44.99%) contribute the largest share of orders, followed by **Loyal Customers (30.34%)** and **New Customers (24.67%).**

Customers receiving **Fast Delivery** provide the highest average rating **(3.01)**. The most common return reason is Wrong Item Delivered **(550)**.

STRATEGIC RECOMMENDATIONS

- **Focus on High-Performing Categories:** Continue investing in **Cycling** and replicate successful promotional strategies from **Winter Sports Fest** to maximize revenue.
- **Improve Store Performance:** Implement best practices from **Decathlon Mumbai** to improve performance of lower-performing stores, especially **Decathlon Bengaluru.**
- **Enhance Customer Experience:** Improve delivery speed and strengthen order verification to increase customer satisfaction and reduce product returns.
- **Strengthen Customer Retention:** Launch targeted loyalty programs to convert **New Customers** into **Loyal Customers** and encourage repeat purchases from **Returning Customers.**
- **Optimize Operations:** Ensure adequate staff and inventory during **Afternoon** (peak time) and continue offering multiple payment methods as per customer preference.

OVERALL BUSINESS IMPACT

- Centralized business performance monitoring through interactive dashboards.
- Faster and more informed management decision-making.
- Improved visibility into sales, store, product, and customer performance.
- Better inventory and promotional planning.
- Enhanced customer satisfaction through data-driven operational improvements.
- Reduced product returns and stronger customer retention.
- Supports profitability improvement by focusing on high-performing products, stores, and promotions.

This project demonstrates the power of **data-driven insights** in improving business performance and driving strategic decision-making.
